### MIXED METHODS RESEARCH METHODOLOGY WORKSHOP

 28 - 29 April 2026

 09h00 – 16h00

 K-rith Tower Building, K2, Medical School

#### WORKSHOP OVERVIEW

Research methodology serves as the cornerstone for fostering innovation and advancement in our world. Join us for a transformative workshop aimed at empowering postgraduate students with a comprehensive understanding of mixed methods research methodology.

This workshop equips students with essential tools to navigate the complexities of research. Delve into topics such as identifying research gaps, formulating research questions and problems, crafting robust research designs, and mastering mixed methods data collection techniques.
